# IGNITING PASSION FOR EXCELLENCE

## Developing Versatile Graduates

We have an excellent legacy when it comes to academics. We also believe in the overall development of an individual. Our sports facilities, which include a futsal court, a tennis court and two basketball courts, are just among a few things which contribute towards our students' holistic development. Our five kilometre track is ideal for cycling, jogging, or even a pleasant walk in the evening. After all, a healthy lifestyle ensures productivity throughout the day.

## Grooming Industry - Ready Graduates

We have established partnerships with leading Malaysian companies with global operations. These companies help our students with internships and employment opportunities. Our industry partners are also involved in curriculum review and development of our programmes. They also continuously engage with the students through industry lecture programmes and training sessions.

## Bringing Out the Entrepreneur in You

Our focus is not just on the content of the syllabus but also in the delivery of knowledge and the nurturing of analytical minds.
