CALL also customize training programs according to your needs, providing you with a strategic learning opportunity.

Some of the key areas which CALL had catered to were data analytics, data science and innovation, sustainability and circular learning.

CALL applies the A.D.D.I.E model as one of the principle to facilitate any training customization requirement to ensure quality, efficient and effective learning solution – as these are designed for a specific need and to engage active knowledge acquisition.

CALL advocates outcome-based learning enabling learners to enhance their competency skills, improve decision making and the ability to adapt and continue learning through self-reflection.
